

# Docker Complete Cheat Sheet

## DOCKER COMPLETE CHEAT SHEET

### 1. IMAGES COMMANDS

```
docker images
docker pull <image_name>
docker rmi <image_name>
docker rmi -f <image_name>
docker image prune
docker build -t <image_name>:<version> .
docker build -t <image_name>:<version> . --no-cache
docker tag <image_name> <username>/<repo_name>:<tag>
```

### 2. CONTAINER COMMANDS

```
docker ps -a
docker ps
docker run <image_name>
docker run -d <image_name>
docker run --name <container_name> <image_name>
docker run -p <host_port>:<container_port> <image_name>
docker run -e <var_name>=<var_value> <image_name>
docker start <container_name>
docker stop <container_name>
docker restart <container_name>
docker pause <container_name>
docker unpause <container_name>
docker inspect <container_name>
docker rm <container_name>
docker rm -f <container_name>
```

### 3. TROUBLESHOOTING COMMANDS

```
docker logs <container_name>
docker logs -f <container_name>
docker exec -it <container_name> /bin/bash
docker exec -it <container_name> sh
docker stats
docker events
```

### 4. DOCKER HUB COMMANDS

```
docker login
docker login -u <username>
docker logout
docker search <image_name>
docker push <username>/<image_name>
```

### 5. VOLUME COMMANDS

```
docker volume ls
docker volume create <volume_name>
docker volume rm <volume_name>
docker volume prune
docker run -v <volume_name>:<mount_path> <image_name>
docker run --mount type=volume,src=<volume_name>,dest=<mount_path> <image_name>
docker run -v <host_path>:<container_path> <image_name>
docker run --mount type=bind,src=<host_path>,dest=<container_path> <image_name>
```

### 6. NETWORK COMMANDS

```
docker network ls
docker network create <network_name>
docker network rm <network_name>
docker network prune
docker network connect <network_name> <container_name>
docker network disconnect <network_name> <container_name>
```

### 7. DOCKER COMPOSE COMMANDS

```
docker compose up
docker compose up -d
docker compose up --build
docker compose down
```

```
docker compose ps
docker compose logs
```

#### 8. CLEANUP COMMANDS

```
docker container prune
docker image prune
docker network prune
docker volume prune
docker system prune -a
docker system prune -a --volumes
```

#### 9. SAVE & LOAD IMAGES

```
docker save -o myimage.tar <image_name>
docker load -i myimage.tar
```

#### 10. SYSTEM COMMANDS

```
docker --version
docker info
docker system df
```

#### 11. MULTI-STAGE BUILD

```
docker build -t <image_name> .
```

#### 12. COPY FILES COMMANDS

```
docker cp <host_path> <container_name>:<container_path>
docker cp <container_name>:<container_path> <host_path>
```

#### 13. ADVANCED COMMANDS

```
docker top <container_name>
docker attach <container_name>
docker rename <old_name> <new_name>
docker export <container_name> > container.tar
```

#### 14. REAL-TIME COMMANDS

```
docker run -it ubuntu bash
docker run -d -p 80:80 nginx
docker run -d -p 27017:27017 mongo
docker run -d -p 3000:3000 node
```
